Short description: Occupation in the main job (Appendix 1)			
HHNBPERS	Número de personas que viven en el hogar, incluido el encuestado	0 - 98 – 1 Sin respuesta (no sabe, no contesta)	Todos
HHNBPERS _0_4	Número de personas de 4 años de edad o menos	0-98 – 1 Sin respuesta (no sabe, no contesta)	Todos
HHNBPERS _5_13	Número de personas de 5 a 13 años de edad	0 - 98 – 1 Sin respuesta (no sabe, no contesta)	Todos
INCOME	Ingreso total mensual neta del hogar (valor en moneda nacional)	∟ ∟ ∟ ∟ ∟ ∟ ∟	Todos
HHINCOME	Renta equivalente mensual neta del hogar	1 Inferior al primer quintil 2 Entre el primer y el segundo quintil 3 Entre el segundo y el tercer quintil 4 Entre el tercer y el cuarto quintil 5 Entre el cuarto y el quinto quintil – 1 Sin respuesta (no sabe, no contesta)	Todos
To be calculated by data manager. Only the net monthly equivalised income is transmitted to EUthyroid.			
Short description: The total net monthly income of a household (total income of a household, after tax and other deductions, that is available for spending or saving; all monetary incomes received from any source by each member of a household are added up; these include income from work, investment and social benefits, plus any other household income; taxes and social contributions that have been paid, are deducted from this sum) that is equivalised (according to an equivalence scale) to reflect differences in a household's size and composition. The variable is to be compiled based on information on household income and household size			

Nombre de la variable	Descripción	Categorías y códigos de respuesta	Filtro

and composition. Firstly, the calculation of the equivalised total net monthly income of the household is to be done according to the following formula:

$$\text{Net monthly equivalised income of the household} = \frac{\text{Total net monthly income of the household}}{\text{Equivalent household size}}$$

Where equivalised household size is a sum of weights attributed to each member of the household according to the modified OECD equivalence scale:
• 1.0 to the first adult;
• 0.5 to the second and each subsequent person aged 14 and over;
• 0.3 to each child aged under 14.

Secondly, conversion into quintile classes/groups is to be done. The data are ordered according to the value of the equivalised total net monthly income of the household. Four cut-point values (the so-called quintiles) of income, dividing all the survey population into five groups equally represented/frequent by
20 % of respondents are found. 20 % respondents with lowest income are coded 1, …, and 20 % respondents with highest income are coded 537.

Appendix 1

The codes should conform to Eurostat standard code list (SCL) - International Standard Classification of Occupations 2008 (ISCO-08) (2 digits):
