HHNBPERS	Broj osoba koje žive u kućanstvu, uključujući sudionika ankete	0-98 – 1 nedostaje (ne zna, ne želi odgovoriti)	Svi
HHNBPERS_0_4	Broj osoba starosti od četiri godine ili mlađe	0-98 – 1 nedostaje (ne zna, ne želi odgovoriti)	Svi
HHNBPERS_5_13	Broj osoba od pet do 13 godina	0-98 – 1 nedostaje (ne zna, ne želi odgovoriti)	Svi
INCOME	Ukupna neto mjesečni prihod kućanstva (vrijednost u domaćoj valuti)	LLLLLLLL	Svi
HHINCOME	Mjesečni neto prihod kućanstva	1 ispod 1. kvintila 2 između 1. i 2. kvintila 3 između 2. i 3. kvintila 4 između 3. i 4. kvintila 5 između 4. i 5. kvintila – 1 nedostaje (ne zna, ne želi odgovoriti)	Svi
To be calculated by data manager. Only the net monthly equivalised income is transmitted to EUthyroid.			
Short description: The total net monthly income of a household (total income of a household, after tax and other deductions, that is available for spending or saving; all monetary incomes received from any source by each member of a household are added up; these include income from work, investment and social benefits, plus any other household income; taxes and social contributions that have been paid, are deducted from this sum) that is equivalised (according to an equivalence scale) to reflect differences in a household's size and composition.			

Oznaka varijable	Opis	Kategorije i kodovi odgovora	Filtar
	<p>The variable is to be compiled based on information on household income and household size and composition. Firstly, the calculation of the equivalised total net monthly income of the household is to be done according to the following formula:</p> $\text{Net monthly equivalised income of the household} = \frac{\text{Total net monthly income of the household}}{\text{Equivalent household size}}$ <p>Where equivalised household size is a sum of weights attributed to each member of the household according to the modified OECD equivalence scale:</p> <ul style="list-style-type: none"> • 1.0 to the first adult; • 0.5 to the second and each subsequent person aged 14 and over; • 0.3 to each child aged under 14. <p>Secondly, conversion into quintile classes/groups is to be done. The data are ordered according to the value of the equivalised total net monthly income of the household. Four cut-point values (the so-called quintiles) of income, dividing all the survey population into five groups equally represented/frequent by 20 % of respondents are found. 20 % respondents with lowest income are coded 1, ..., and 20 % respondents with highest income are coded 537.</p>		

Appendix 1

The codes should conform to Eurostat standard code list (SCL) - International Standard
